Main Objectives

- **Update the members** products/services euroGOOS webpage – out of date or non functioning links! – Final objective : Make an attractive catalogue of added-value products and Services accessible in the EuroGOOS webpage
- Make the page more attractive **for showcase of the products/Services**
- Products/services are very heterogeneous: information from metocean buoys; data portals; forecasts/hindcast of different variables; fit-for-purpose services (HABs...)...

Actions

- Mail sent to all members (23th March) to ask updated information about the services/products and to update links (**13 members came back with some info/updates**)
- The actual webpage was updated with the information provided.
- In the actual catalogue we have a total of **52 products/services** (correct links to webpages).
