

**Agenda Item 6: 2019 integrated work plan**

**Meeting Document 6.4: New Task Team logos**

EuroGOOS task teams have not had agreed logos and some task teams started developing and using their own designs, which looked different in terms of style and could either include or not reference to EuroGOOS. The EuroGOOS Comms. Unit proposed to standardize the logos for a uniform and agreed design and content. This was already discussed with the HFR Task Team Chair who welcomed the approach.

This document presents the logos for five EuroGOOS task teams designed by the office in January 2019. **The meeting is asked to discuss and/or approve the logos after which they can be officially sent to the task teams and used.** It is also asked that the **meeting discusses the approach to the Argo and Fixed Platform task teams.** The following points should be considered:

- The Argo Task Team consists fully of Euro-Argo ERIC, which has its own logo. However, should a logo be created for the Task Team (possibly reflecting both EuroGOOS and Euro-Argo ERIC)?
- The Fixed Platforms Task Team has just been relaunched further to the signature of an MoU between EuroGOOS AISBL and EMSO ERIC (November 2018). However, EMSO does not wish to limit the EuroGOOS FT TT to the EMSO membership only, rather EMSO sees the task team as an opportunity to expand the network. Should a logo be created featuring the Fixed Platforms Task Team name (meaning it's broader than EMSO), but which includes also the EMSO ERIC's logo?
